

RevSpring

Health Plan Roundtable

February 18, 2026

Agenda

- **Transparency in Coverage (TiC) Results & Updates:** Review compliance results and information on the 2026 Schema 2.0 updates for all publicly disclosed machine-readable files (MRFs).
- **Medicare Plan Finder Phase II:** Update on next phase and review of key details.
- **Unified Search:** Update on the Unified Search rollout plan.
- **Maps UI & Cost on Maps:** Review the map user interface update and the integration of real-time patient cost estimates directly within the map view.
- **Search By Plan & Scheduling UI:** Finalize the navigation updates for Search By Plan menus and the latest design iterations for Augmented Scheduling.
- **Enhanced Search Cards:** A review of the new design aimed at reducing cognitive load and accelerating the path to care.

MRF 2.0 Results and Updates

- **MRF 2.0 Compliance Results**

- As of today, Kyruus Health has implemented 21 customers are implemented across 27 LOBs to meet the new MRF 2.0 requirements

- **MRF 2.0 Compliance Updates**

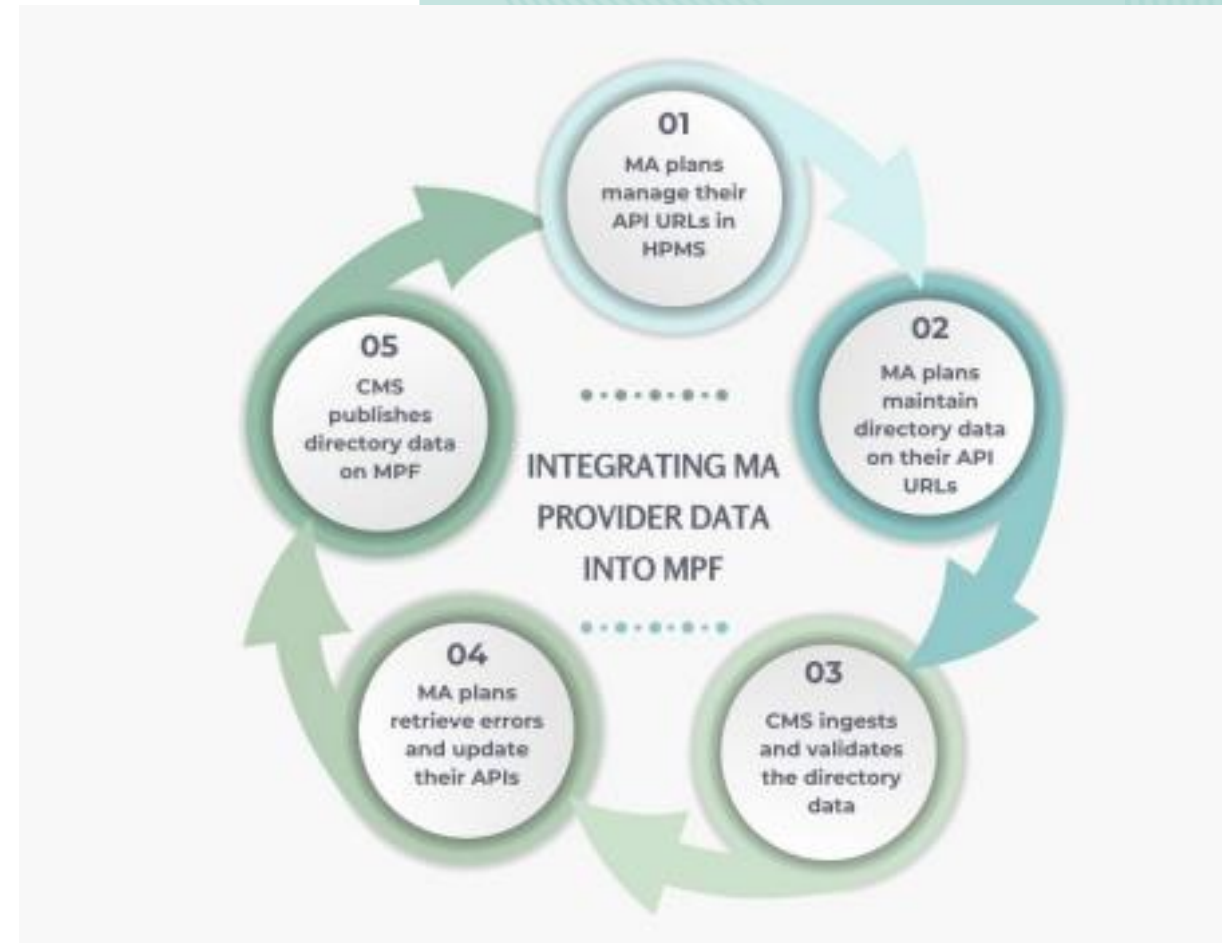

- Our data operations team is currently engaging the remaining clients to support MRF 2.0 based on their timelines

TiC Coverage Proposed Rule (2026)

- **The "Basics" (What's Changing):**
 - **Less Admin, More Efficiency:** Reporting moves from **monthly to quarterly**.
 - **Network-First Data:** Files will be organized by **provider network** rather than individual plan, drastically reducing the total number of files.
 - **Cleaning the "Ghost Rates":** Plans must now strip out irrelevant data (e.g., a pediatrician's rate for a hip replacement) to reduce "file bloat."
 - **New "Findability" Rules:** A mandatory "Price Transparency" link in your website footer and a standardized file to help search engines index your data.

Medicare Plan Finder Phase 2

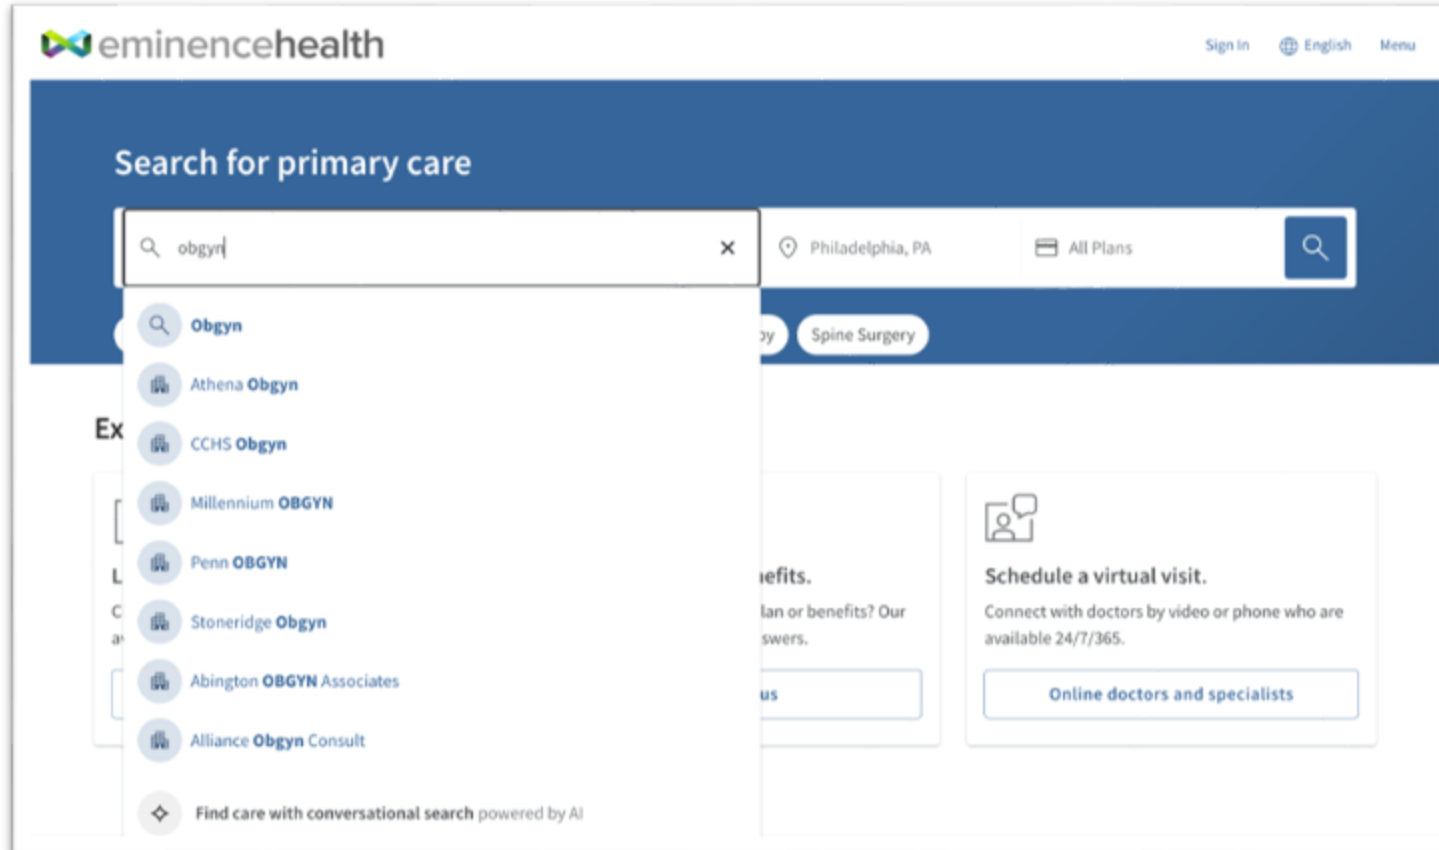

- **Current Status:** Kyruus Health is still waiting to receive finalized technical requirements from CMS. This is still pending (last communication with CMS was 2/17). For the time being, Kyruus is working off the draft changes published towards the end of 2025.
- **Potential Impact to Customers:** The based on the draft, Kryuus Health customers who want to take advantage of this offering will need to provide additional information to ensure all necessary data elements can be exposed over FHIR:
 - Medicare Contract Information
 - NPI

Payer Applications

Unified Search Rollout Plan

New Required Customer Migration Date: April 2027

- Starting **April 1, 2027**, we will no longer support the tile search experience.
- All customers must migrate to unified search by this date.
- We will be conducting discovery and enhancing the feature throughout 2026.

Recently Released

Keeps booking experience in drawer on health plan's site

Benefits

- **Eliminate Member Drop-off:** Replaces external redirects with an integrated drawer, keeping members within the health plan's environment to prevent dead ends and confusion.
- **Strengthen Network Steering:** Ensures members remain within the health plan ecosystem, allowing for seamless redirection to other high-value, in-network options

Release Plan

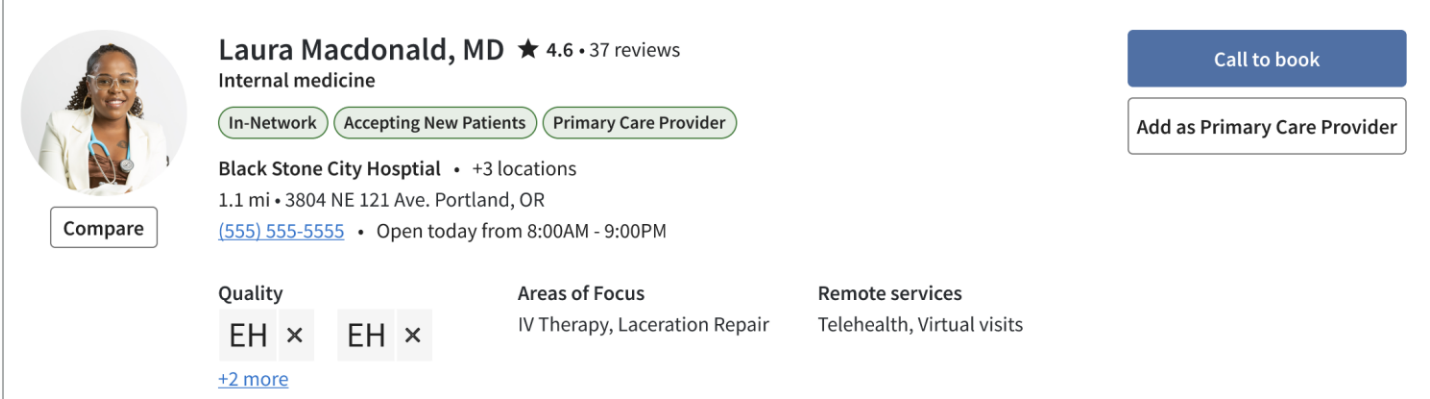

- Auto-on
- UAT date: March
- Time in preview: 1 week

Enhanced Search Cards

Simplify critical decision-making information

Benefits

- **Instant Clarity:** Reduces cognitive load by removing empty data fields and optimizing the layout to display the most essential information.
- **A Faster Path to Care:** Elevates key provider details and emphasizing calls-to-action, enabling members to find and secure care with fewer clicks.
