REVSPRING

# What's new since acquisition

Connecting care access, engagement & financial resolution

## How our story has evolved

We've gained the ability to engage patients and drive digital payments across the entire patient journey.

### HUMAN UNDERSTANDING

**Behavior, sentiment & financial context—at the patient level**

- RevSpring scoring models tailor every billing and payment touchpoint to feel personal
- Picks up where the Kyruus Access experience leaves off

### OPERATIONAL IMPACT

**Workflow automation inside the systems your teams already use**

- Statements, reminders, digital payments, and reconciliation routed through your EHR and revenue-cycle tools
- No rip-and-replace

### DYNAMIC INTELLIGENCE

**Messages, timing & channels that adjust in real time**

- Continuously tuned by patient response, balance behavior, and channel preference
- Spans print, email, SMS, IVR, and portal, and call center

## WHY WE'RE DIFFERENT

# Most vendors solve half the problem

Today, provider data, engagement and billing teams each run their piece well – but they struggle to align and operate they across many vendors. RevSpring connects them on one data layer, while personalizing experiences along the way.

Others solve isolated moments in the patient journey

**RevSpring connects every interaction from first search to final payment—on one data foundation.**

# **Provider solutions**

**Q3 2026**

REVSPRING

# Kyruus Connect for provider & locations

Q3'26 Product Roadmap

## AI-generated provider bios

### Get instant coverage across your full network, without requiring your team to write a single word.

Kyruus uses the structured data in Kyruus Connect and trusted websites to generate accurate, professional bios for every provider in your network.

- **Meaningful bios** for your full network, including the providers who've never had one
- **Consistent quality and voice at scale.** Each health system gets a configuration that matches their brand standards and communication guidelines.
- **Higher search visibility** as richer profiles are more likely to surface in AI-powered search
- **A review-and-approve workflow built into the core product.** No bio publishes without explicit sign-off, giving health system teams full control over what reaches patients.

The screenshot displays the Kyruus Health AI Approval Queue interface. On the left is a sidebar with navigation options: Home, Settings, Data, and Analytics. The main content area is titled 'Review AI Suggestions / AI Approval Queue' and contains a table of provider bios. The table has columns for Profile, Field, and Current value. The first row shows Sarah Smith, M.D. with a Professional Statement. To the right of the table is a modal window titled 'Review AI suggestion' with a 'Pending' status. The modal shows the provider profile for Sarah Smith, M.D., the current value of her professional statement, and a suggested value. Below the suggested value, it shows the submission date (03/10/2025 9:00AM), external sources (Healthgrades, Doximity, Vitals), and an AI confidence level of 'High'. At the bottom, it lists assigned reviewers: Sara Rodriguez and Hugo Silva, with 'Reject' and 'Approve' buttons.

| Profile                                    | Field                  | Current value                                                                                                                                 |

Professional Statement

**Current value**  
Dr. Smith is a cardiologist.

**Suggested value**  
Dr. Sarah Smith is a Professor of Clinical Medicine at the Johns Hopkins University School of Medicine. She serves as the Interim Director of the Division of General Internal Medicine and Clinical Director of the Division of General Internal Medicine. She is a member of the Society of General Internal Medicine and has served as president for the mid-Atlantic region. A fellow of the American College of Physicians, she obtained her medical degree from the University of Maryland School of Medicine. She completed her residency in internal medicine at Case Western Reserve University/University Hospitals of Cleveland. Following this she became chief resident and a faculty member at Case Western.

# Approval workflow upgrade

Data Governance,  
Made Simpler

## WHAT'S NEW

- Provider Profiles remains editable even when a review is pending, removing the data restrictions of the current AWF tool
- Modern interface to approve and reject with fewer clicks
- Assign reviewers to groups for easier management
- Self-service: admins can set up or change reviewers for each practice group without needing support tickets

AI ENRICHMENT

# AI enrichment: what's next & later

In Development & On the Horizon

## NEXT – In Discovery

### Clinical Keywords for Health Systems

AI-derived, claims-informed keywords mapped to each provider's actual practice patterns – not just specialty labels.

### Provider Profile Scores

Automated SEO + GEO + patient friendliness scoring to surface profile gaps and prioritize improvements.

## LATER – On the Horizon

### Insurances Accepted

Verified, continuously-updated payer data surfaced at the individual provider level.

### Frequency of Services

Claims-derived procedure volume to validate and enrich clinical keyword accuracy.

### Per-Location Equipment

Facility-level capability data to improve searchability and patient routing decisions.

### Research and Publications

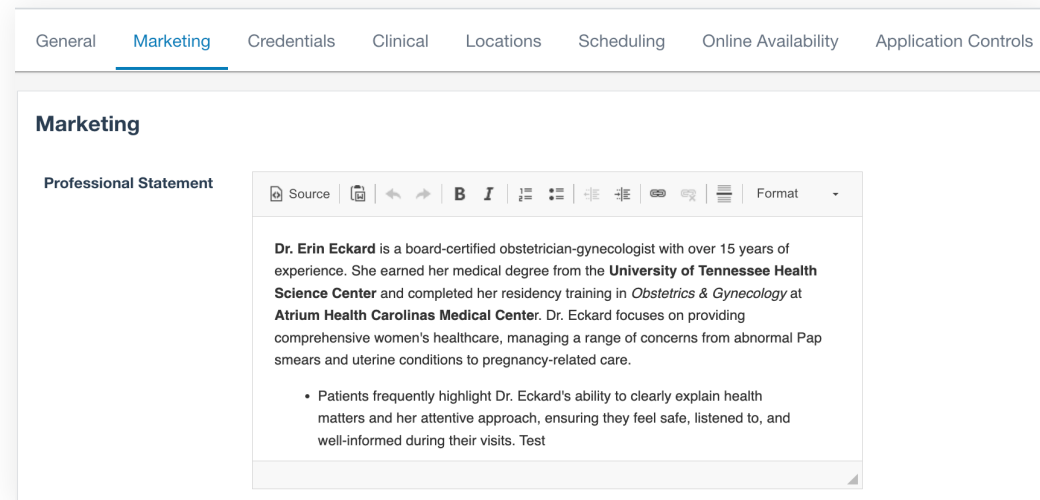

Automatically surface research and clinical contributions on providers profiles.

### Smart Bio Refreshes

Surface suggested bio changes as your underlying data evolves.

# Rich text support for providers & locations

Support bold, lists, [links](#), and more across key description fields

The screenshot displays a web interface with a top navigation bar containing tabs: General, Marketing (selected), Credentials, Clinical, Locations, Scheduling, Online Availability, and Application Controls. Below the navigation bar, the 'Marketing' section is active, showing a 'Professional Statement' text area. This area includes a rich text editor toolbar with icons for Source, Undo, Redo, Bold (B), Italic (I), Bulleted List, Numbered List, Indent Left, Indent Right, Link, Unlink, and a Format dropdown menu. The text within the field is formatted with bold and italics. A bulleted list is also present at the bottom of the text block.

**Dr. Erin Eckard** is a board-certified obstetrician-gynecologist with over 15 years of experience. She earned her medical degree from the **University of Tennessee Health Science Center** and completed her residency training in *Obstetrics & Gynecology* at **Atrium Health Carolinas Medical Center**. Dr. Eckard focuses on providing comprehensive women's healthcare, managing a range of concerns from abnormal Pap smears and uterine conditions to pregnancy-related care.

- Patients frequently highlight Dr. Eckard's ability to clearly explain health matters and her attentive approach, ensuring they feel safe, listened to, and well-informed during their visits. Test

Once live, all text fields, both standard and custom, in Providers and Locations will support rich text.

# Location data management

## Clinical Keywords for Locations

Extend KCL clinical taxonomy to locations so location search (in Guide) is as sharp as provider profile search – powered by the same Template Management and Bulk Edit tools already in place.

## Provider-Location Intersectional Data

Extend the provider-location data to support working hours, Reach publishers, specialties, and custom fields, so health systems can fine-tune provider context down to the individual location.

## Special, Holidays & Exception Working hours

Handle holidays, closures and one-off schedule changes with exact start and end dates at the location level.

## Partner with us!

New experience! We're always listening for feedback and ways to make it better. Got thoughts? Your CSP is the way in.

# Provider Data Management Q3 Roadmap

## Audit Logs for Ingestion Changes

Extending Data Auditing to ingestion changes as well, covering all data changes made either manually or through ingestion for Providers data

Coming Soon

## CSV Upload for Clinical Keywords

CSV upload to update templates and provider clinical configurations, completing the loop of export, edit, and update for Clinical Data Management

## Export & Bulk Update Providers Data

Doubling down on the Export and Bulk Update feature, extending it from Locations to Providers as well, making data management simpler

## Reach Tab in Connect Admin

Dedicated Reach tab for all standardized fields at the Provider-Publisher-Location intersection, making it easier for users to manage provider data for each publisher

REVSPRING

# **Reach: listings and reputation management**

# Standard Reach fields

- Introduction of a Reach tab at the provider and location level
- Single pane to control all Reach fields for Listings and Reputation Management and all publishers
- Increased flexibility at the provider-location intersect

# Listings UI updates

Overview tab

REACH

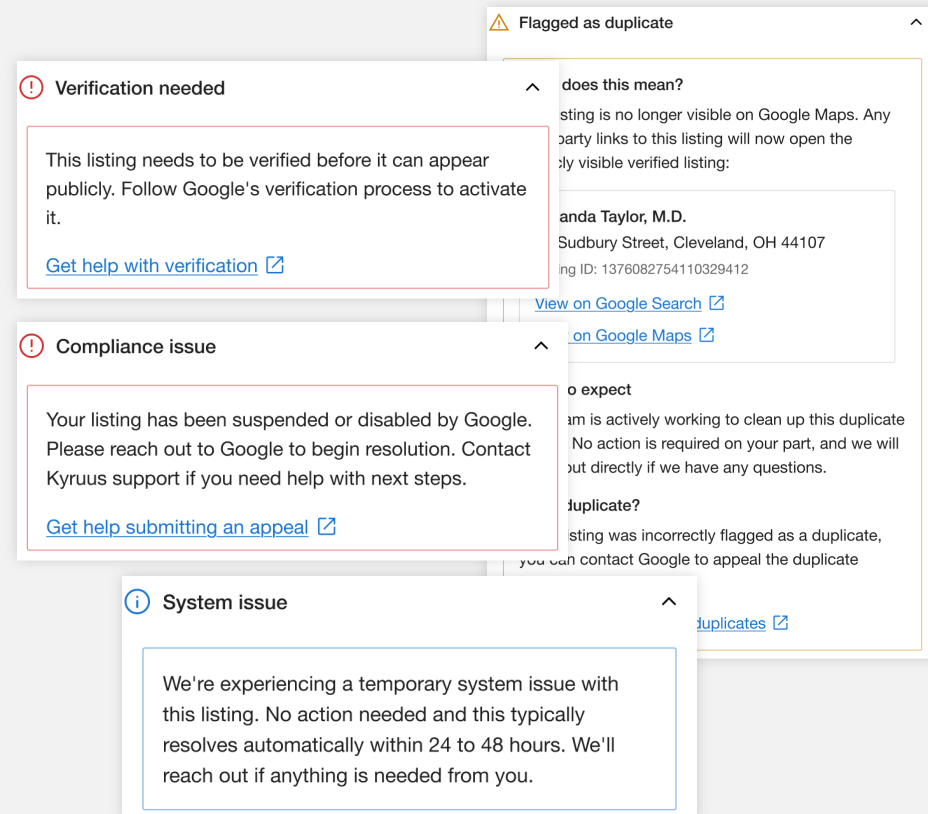

- Simplify listings management by utilizing a single UI for easy viewing, tracking and updating
- Get an at-a-glance view of your entire listings footprint – see total managed listings, what's live and what's still in progress
- Quickly identify listings that need attention, with issues broken down by type: data issues, compliance, verification needed, and duplicates.

# Listings UI updates

## Needs Attention Flags

- Surface listings that require action, organized by issue type – data issues, compliance, verification needed, duplicates, system issues.
- Prioritize your work at a glance with issue counter per category, so your team knows exactly where to focus first.
- Drill into any issue type to see the specific listings affected and take action directly from the list.

# Listings completeness score

- **Know exactly where your listings stand, at a glance** – a publisher-aware completeness score for each provider and location listing shows customers precisely which data gaps exist across Google, Apple, Bing, and Healthgrades, so teams can stop manually auditing fields and focus on what actually needs attention.
- **Prioritize the changes that move the needle most** – required fields are weighted more heavily in the score, guiding listing managers toward the highest-impact improvements first and making it easy to track progress as data quality improves over time.

 Google Business Profile listing ×

**Amanda Scott, M.D.**  
Main Street Clinic • 450 Main St, New York, NY 10044  
⌚ Verification in progress

---

**Listing completeness score**

**79**

|                     |         |
|---------------------|---------|
| Required fields     | 11 / 15 |
| Good to have fields | 8 / 15  |
| Optional fields     | 7 / 10  |

# Image scaling service update

## Introducing Fit Behavior

- **Provider photos on Google Business Profile now display full portraits** – images are intelligently scaled to fit landscape formats without aggressive cropping or zooming, so patients see a complete, professional photo of their provider rather than a tightly cropped face.
- **No image re-uploads required** – improved image scaling through a simple configuration change, preserving existing workflows while immediately improving the visual quality of syndicated provider listings across publisher platforms like Google.

# Reserve with Google

Expanding to Include Locations (Beta)

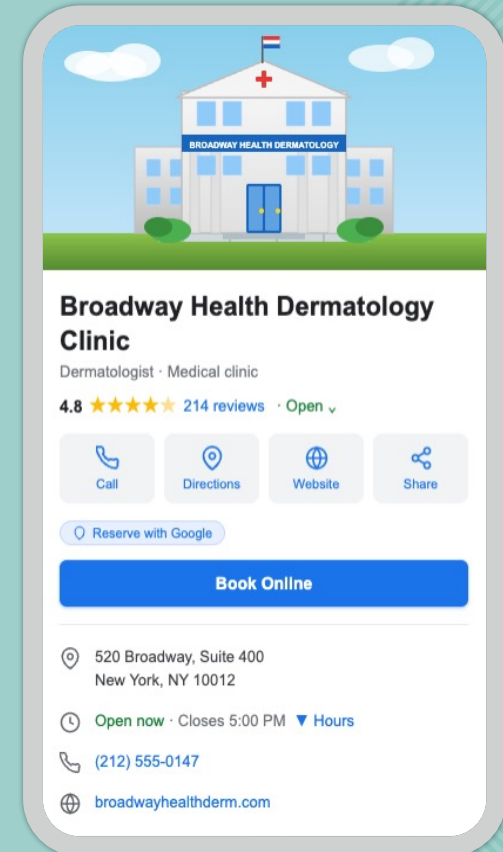

## ➤ Capture location-based searchers, not just provider searches:

Many patients search for "clinic near me" or a specific practice name rather than an individual doctor. Extending Reserve with Google to locations ensures those patients see a "Book Online" button too, so no appointment opportunity is lost based on how someone searches.

## ➤ Strengthen the location's online presence:

The blue "Book Online" button signals to prospective patients that the practice is active, accessible, and tech-forward – a competitive differentiator on a crowded search results page.

### LISTINGS MANAGEMENT

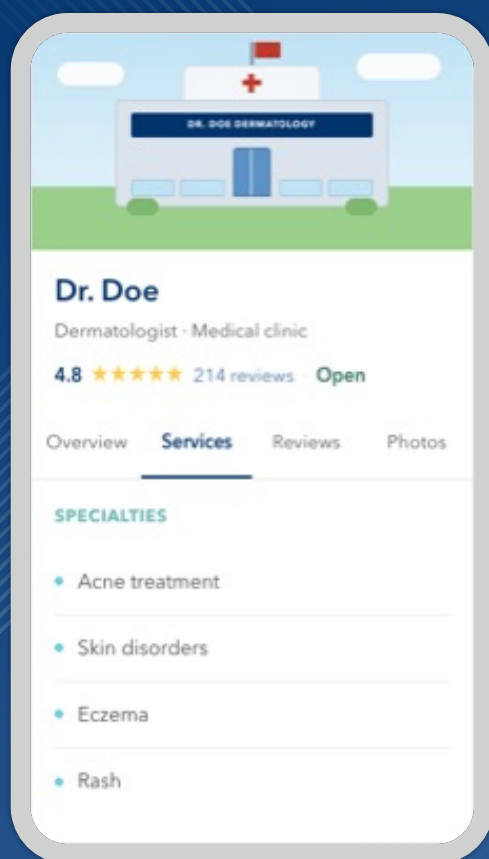

## Increased data points - Google

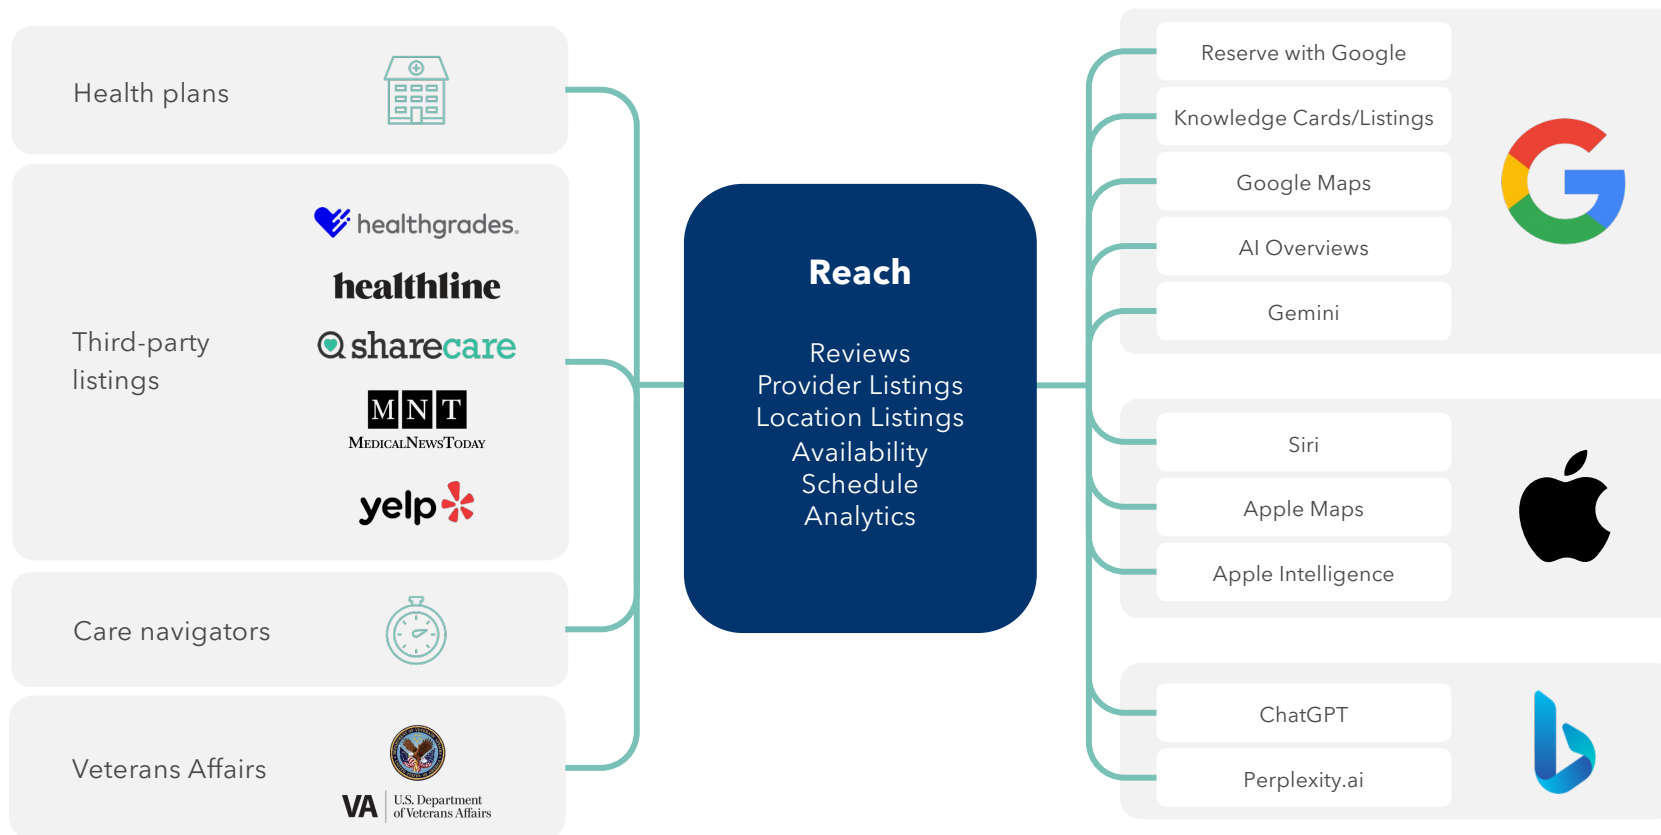

More healthcare data, more value

➤ **Putting healthcare data where it's useful:** We're enriching Google Business Profiles with clinical keyword data, surfacing what providers actually treat right where patients are already searching.

➤ **More informed patients, right at the point of search:** Patients can see the specific conditions and specialties a provider treats directly on their Google Business Profile – helping them confirm fit before they ever click through or call.

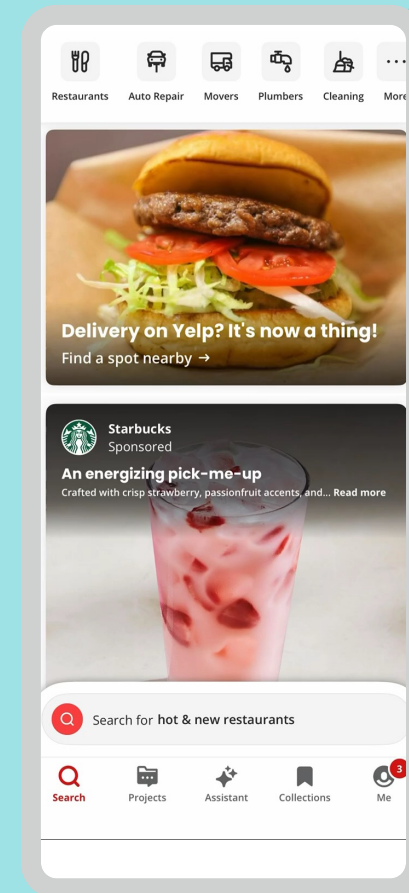

# Listings you can trust, straight from the source

# Gain visibility on Yelp and ChatGPT

Yelp offers **over 60 categories** in the Health & Medical parent category.

**Strategic partnership with OpenAI/ChatGPT**, 330M reviews and photos integrated and pulling into search results directly from Yelp.

View list of all Yelp categories [here](#)

- Enable provider-agnostic scheduling for locations.
- Generally available now.

# Real-time wait times

Coming soon for Cerner-powered health systems.

ESTIMATED WAIT AT ARRIVAL

**14 min**

## Set expectations early

Patients see estimated waits before arrival, easing anxiety and frustration.

## Reduce walkouts

Transparent, live estimates cut waiting-room abandonment and no-shows.

## Lighten staff load

Self-service wait visibility cuts inbound "how long?" calls to front-desk staff.

## Boost satisfaction

Accurate real-time data builds trust and lifts patient experience scores.

# Insurance validation & copay display

## Copayment due

Pay your visit copay now to save time at check-in.

**\$40.00** due at visit

 Pay copay now

- **Real-time insurance validation and copay retrieval during scheduling** – giving patients cost transparency before they confirm their appointment.
- **Retrieve estimated copay amounts in real time** based on patient insurance data.
- **Display copay to patients during scheduling** so they can plan ahead.
- **Reduces no-shows and front-desk friction** caused by surprise cost disclosures.

REVSPRING

# Search & UX

# Three ways to leverage search

Flexible deployment options to accommodate your health system's needs.

## Search APIs

Integrate our provider search APIs directly into your own find-a-doctor experience, giving your team full control over design and implementation.

## Provider Directory

Deploy our ready-built, branded directory UI powered by the Search APIs, hosted on a dedicated domain with no development lift required.

## Guide for Providers

Offer patients a unified search experience living directly on your health system's website – surfacing providers, locations, *and* your web content in a single, seamless search.

# Advanced NLP: smarter provider search

Understanding complex, multi-term queries

## QUERY IN ACTION

"Female Spanish speaking cardiologist  
near Columbus"

### NLP Engine Extracts:

**GENDER**  
female

**LANGUAGE**  
Spanish

**SPECIALTY**  
cardiologist

**LOCATION**  
Columbus

**Before:** Keyword-only matching – missed specialty + language combo

**After:** Each term extracted, categorized, and matched independently

## SEARCH FOR PROVIDERS

### ENHANCEMENTS

✓ LIVE

SEARCH FOR PROVIDERS

# The knowledge graph

Intelligently mapping symptoms & plain-language phrases to the right clinical specialty

ROLLOUT TIMELINE

● Beta launch in progress

● All health systems Later Q3 – GA release

# Enterprise health system MCP

Source of truth for your agents to recommend care

## **Private MCP server**

that gives AI agents direct, secure access to your health system's own verified provider and network data

## **Acts as a translation layer between AI agents and our existing Search API,**

so agents can query provider and location data without custom integration work

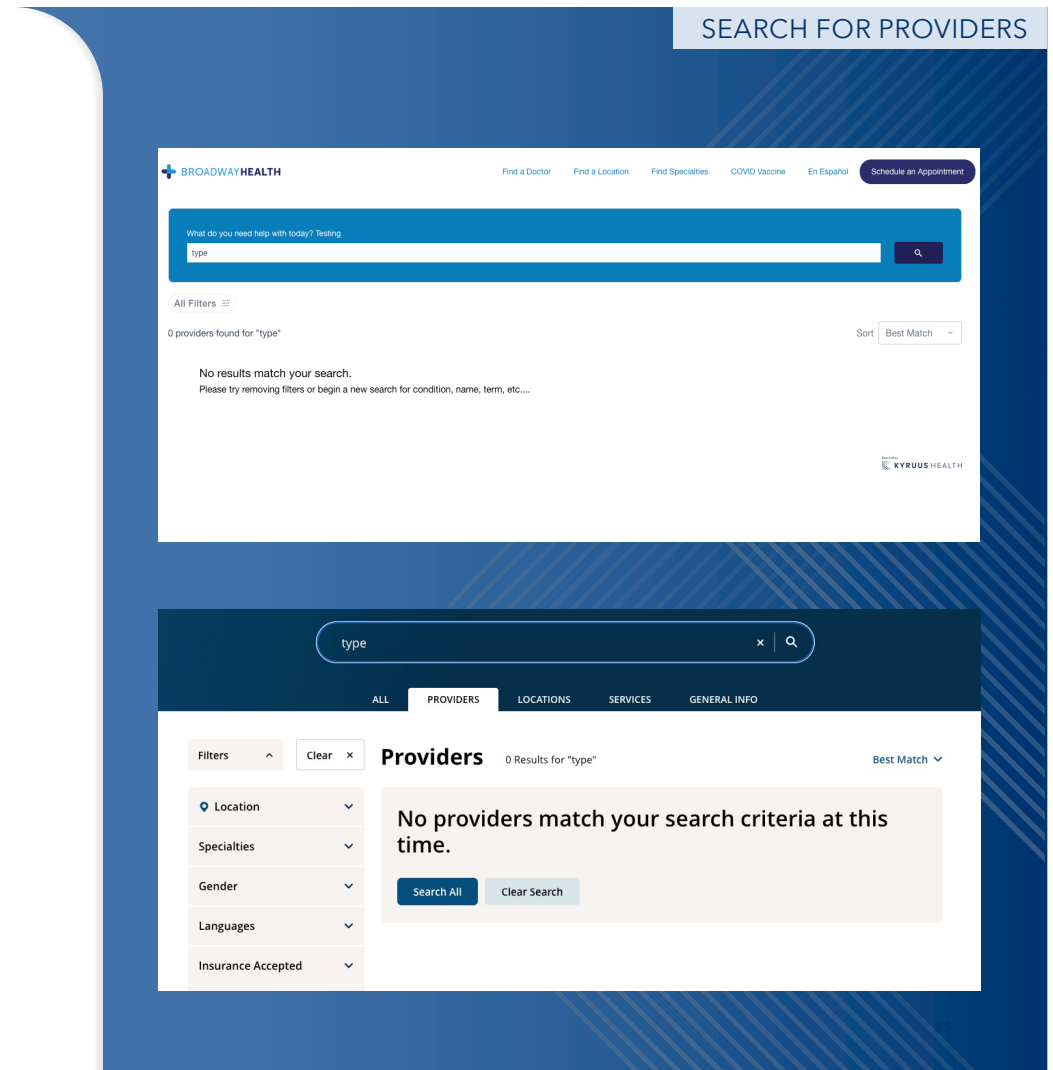

## **Isolated instance grounded in your data**

that allows health systems to own internal AI initiatives

# Get to the right care, even if a search comes up empty

Fewer dead ends, more care options

- **Smarter "No Results" Handling** - Enhance the no-results page with helpful, actionable guidance that connects patients to care
- **Improved search suggestions** - Include suggested search experiences on the no results page
- **Tackling over-filtering** - Recover gracefully when a patient's filter combination returns no results, guiding and communicating with the patient on next steps

# Improved suggestions based on your search

- Relevant results, even on a partial match
- Categorized, intuitive suggestions for a patient to explore and connect to more care options
