April 1, 2026. Patient Portal Booking Button within Scheduling

Existing patients can now link straight to the Patient Portal from within the provider scheduling flow via a user-friendly button, reducing friction for a more streamlined booking experience.

- **Direct Patient Portal Integration:** Health systems that require established patients to book via their patient portal (MyChart, Cerner etc.) can now provide a seamless transition directly within the scheduling flow.
- **Optimized User Experience:** Instead of using warning banner text to drive existing patients to the patient portal, a clear, dedicated button can be added to the initial step of the scheduling flow.
- **Reduced Scheduling Friction:** This update reduces confusion and unnecessary steps for existing patients, allowing them to bypass the new patient scheduling flow and link directly to their portal for a faster booking experience.

If you would like to utilize the patient portal booking button, please reach out to **kyruussupport@revspringinc.com** or your customer success partner.

For more product updates, visit the Release Notes section of the Kyruus Health Help Center.

Support is available Monday to Friday from 9 AM - 9 PM (Eastern)
