Kyruus Health Product Updates

/ Kyruus Connect

March 23, 2026. Generally Available: Enhanced Provider Search Capabilities

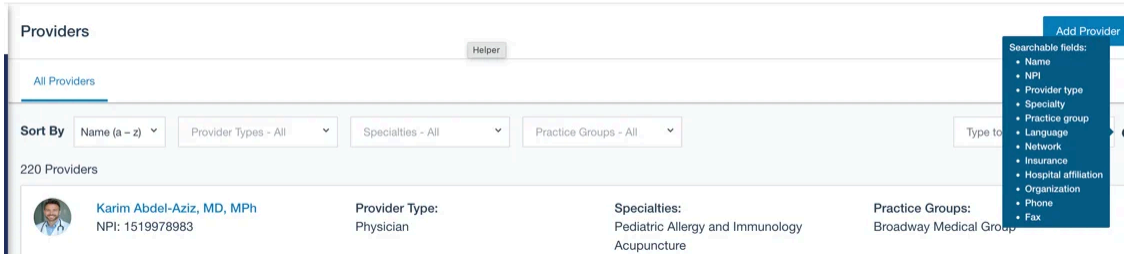

We have expanded search functionality on the Providers Listing Page to include 7+ new searchable fields beyond the basic five (Name, NPI, Provider Type, Specialties, and Practice Groups).

New Search Fields:

- **Contact Details & Language:** Phone number, fax and languages
- **Organizational Data:** Network, insurance, hospital affiliations and provider organization

The Impact: Administrators can now use specific identifiers to locate providers directly, eliminating manual filtering and external cross-referencing. Database indexing ensures fast search results without impacting system performance.

This update has been deployed for all customers.

/ Kyruus Connect

March 26, 2026. Generally Available: Inactive Providers Tab

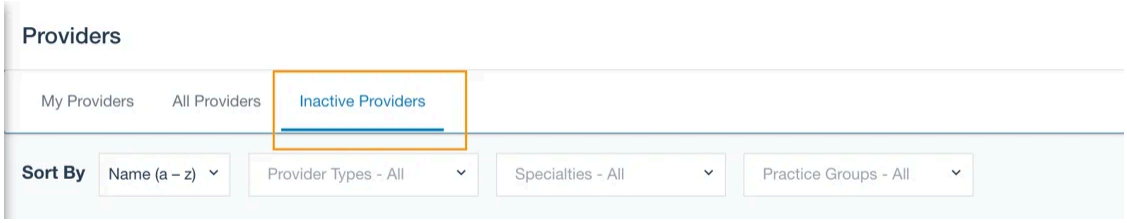

We have added a dedicated "Inactive Providers" tab to the Kyruus Connect Admin Provider listings page, providing administrators with a streamlined view of providers who are not currently active in the system.

New Capability:

- Dedicated "Inactive Providers" tab alongside existing "My Providers" and "All Providers" tabs
- Displays providers who have never been activated or have been deactivated

The Impact: Administrators can now quickly identify and manage inactive providers without manually filtering through the full provider list. This dedicated view eliminates the need to search across active providers to find inactive ones, improving database management efficiency and enabling faster decision-making on provider status updates.

This update has been deployed for all customers.

For more product updates, visit the Release Notes section of the Kyruus Health Help Center.

Support is available Monday to Friday from 9 AM - 9 PM (Eastern)
