Kyruus Health Product Updates

Kyruus Health is updating our support contact information. Beginning February 19, 2026, please reach us at **kyruussupport@revspringinc.com**. To ensure seamless communication during this transition, please ask your IT team to whitelist the **@revspringinc.com** domain. We will continue to monitor the previous address temporarily to support your needs.

The following product updates were released on or before February 19, 2026.

/ Schedule

February 19, 2026. Sending Discrete Fields to Epic – Patient Insurance
We now support sending patient insurance details directly into Epic's discrete insurance fields. Previously, this information was only included in appointment notes.

Why This Matters

- **Cleaner Data Entry:** Details are mapped to specific fields in the patient chart rather than being buried in notes.

- **System Alignment:** Precise field mapping ensures that your registration forms and Epic's Payer master file work in sync.
- **New Insurance Records:** When an appointment is booked, the insurance details create a new insurance record within Epic. This process is additive—it will not remove or overwrite any existing insurance information already in the patient's profile.

This is an integration handled by our team, requiring no configuration changes on your end. If you're interested please reach out to your Customer Success Partner or kyruussupport@revspringinc.com so we can ensure your registration form is using the required updated insurance fields.

/ Kyruus Connect

February 19, 2026. Automated Kyruus-to-Epic Data Sync

Kyruus Health is evolving into the active data engine for your entire ecosystem. We are introducing a real-time integration via HL7 MFN messages to automatically push our "Golden Record" data—including clinical tags and marketing attributes—directly into your Epic SER tables.

The Impact

- **Automated Updates:** Eliminate manual data entry for IT and credentialing teams.
- **Enhanced Native Search:** Power MyChart and internal Epic searches with enriched clinical keywords.
- **Unified Ecosystem:** Bridge the gap between your "Front Door" and clinical back-end, including providers outside your primary Epic network.

If you are interested, please reach out to your Customer Success Partner to learn more details.

For more product updates, visit the Release Notes section of the Kyruus Health Help Center.

Support is available Monday to Friday from 9 AM - 9 PM (Eastern)
