Kyruus Health Product Updates

The following product updates were released on or before February 5, 2026.

/ Schedule

February 5th, 2026. Generally Available: Guarantor on the Patient Registration Form for Athena Health

We've introduced two new optional fields to the online patient registration form to improve the booking experience for minors and ensure proper communication workflows. These updates help us accurately identify and communicate with the patient's parent, legal guardian, and/or guarantor.

- **Guarantor Email Address:** This optional field allows the person completing the registration (who may not be the patient) to provide their email address. This email will populate the **guarantor email** discrete field within the Athena EHR for new patients, or flow through the appointment notes for existing patients.
- **Guarantor Relationship:** This optional field asks for the relationship of the person providing the *Guarantor Email Address* to the patient (e.g., Parent, Legal Guardian, Grandparent). This helps us keep accurate records for the patient. This relationship will populate the **guarantor relationship** discrete field within the Athena EHR for new patients, or flow through the appointment notes for existing patients. If no selection is made, the type will default to "*other".*

These fields can be added to your default Schedule patient registration form or any specific differentiated registration form you leverage for scheduling appointments. You can also customize the name of these fields in your registration form.

Please reach out to support@kyruushealth.com or your customer success partner to configure these additional fields.

/ Kyruus Connect

February 5, 2026. Generally Available: Updated Adult Congenital Cardiac Disease Specialty Label

We have updated the specialty label "**Adult Congenital Cardiac Disease**" to "Adult Congenital Heart Disease" to align with professional standards of the American Board of Internal Medicine and the Royal College of Physicians and Surgeons of Canada board certification, as well as available fellowship programs.

- **Seamless Transition:** Affected providers have been updated automatically.
- **Persistent Search:** The former label remains available as an alias for easy discovery.

This update has been deployed for all customers.

For more product updates, visit the Release Notes section of the Kyruus Health Help Center.

Support is available Monday to Friday from 9 AM - 9 PM (Eastern)
