July 8, 2026. Now in UAT: Enhanced Search Cards in Map View & Profile Location Map

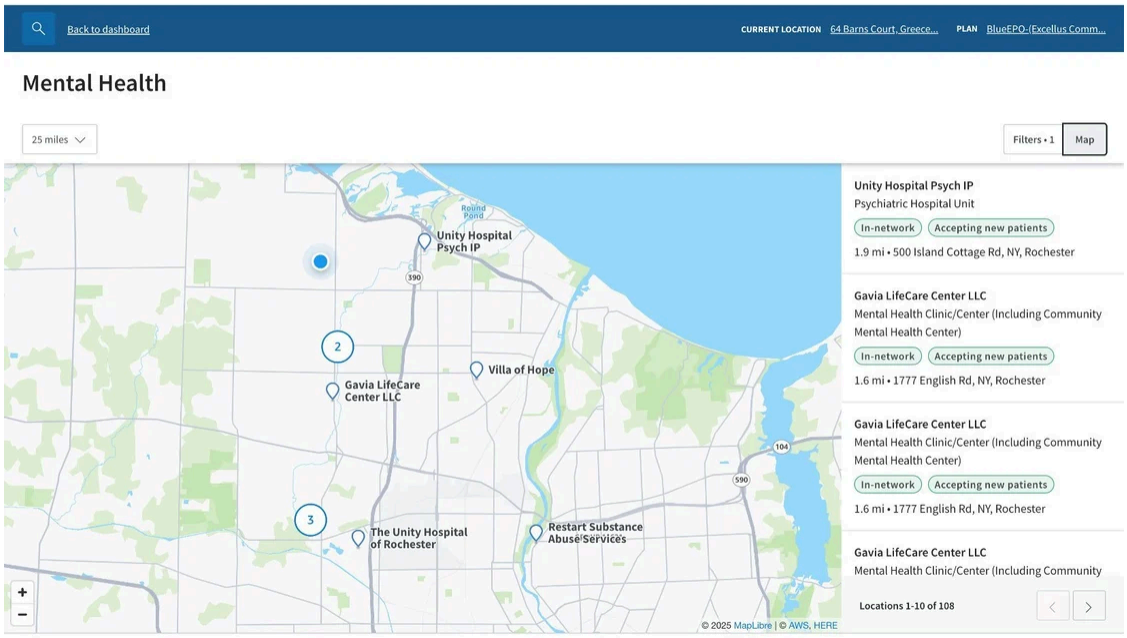

We've extended the enhanced search card experience to two additional surfaces: the search results map view and the provider profile page, moving toward a more consistent card experience across all surfaces.

What's New:

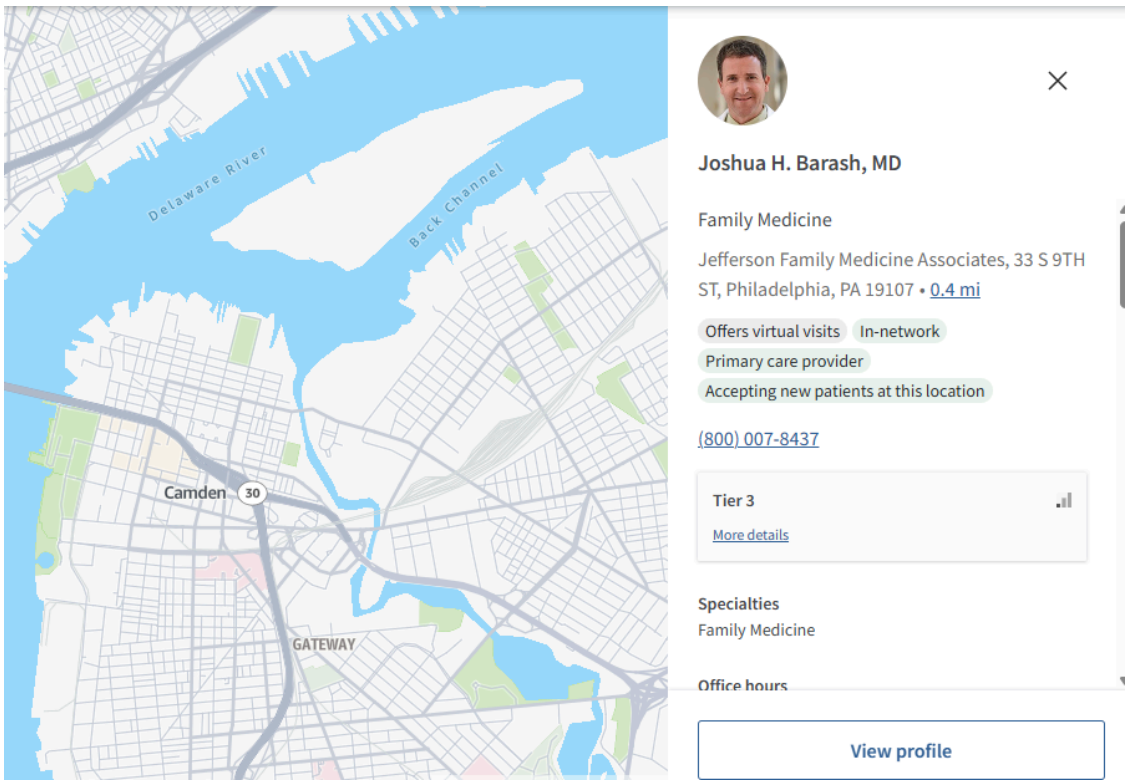

- **Enhanced Cards in Search Map View:** When members switch to map view on the search results page, both the collapsed cards and the expanded selected card now use the enhanced search card design, consistent with the list view. The selected card has been consolidated to display a maximum of 2 attributes, matching the mobile card design for improved readability.
- **Enhanced Card for Selected Location on Profile:** The selected or primary location on provider and searched location profile pages now displays using the enhanced card design, with phone number and office hours surfaced in the header.
- **Interactive Map Replaces "In-Person Locations" Section:** The collapsible "Other Locations" card list on the provider profile page is replaced with an interactive map. All of a provider's locations appear as pins, with the current profile location labeled "Current Profile Location" on hover. Enhanced cards display alongside the map and can be expanded for more detail. The standalone map button previously in the upper right of the profile page has been removed.

- **"In-Person Locations" Rename:** The "Other Locations" section on the provider profile page has been renamed to "In-Person Locations" to better distinguish it from Virtual Care.
- **Virtual Providers:** As part of this update, provider profiles now have two distinct location sections, "In-Person Locations" (the new interactive map) and "Virtual Care" (a collapsible card section for virtual care options). Previously, all locations were grouped together under "Other Locations."

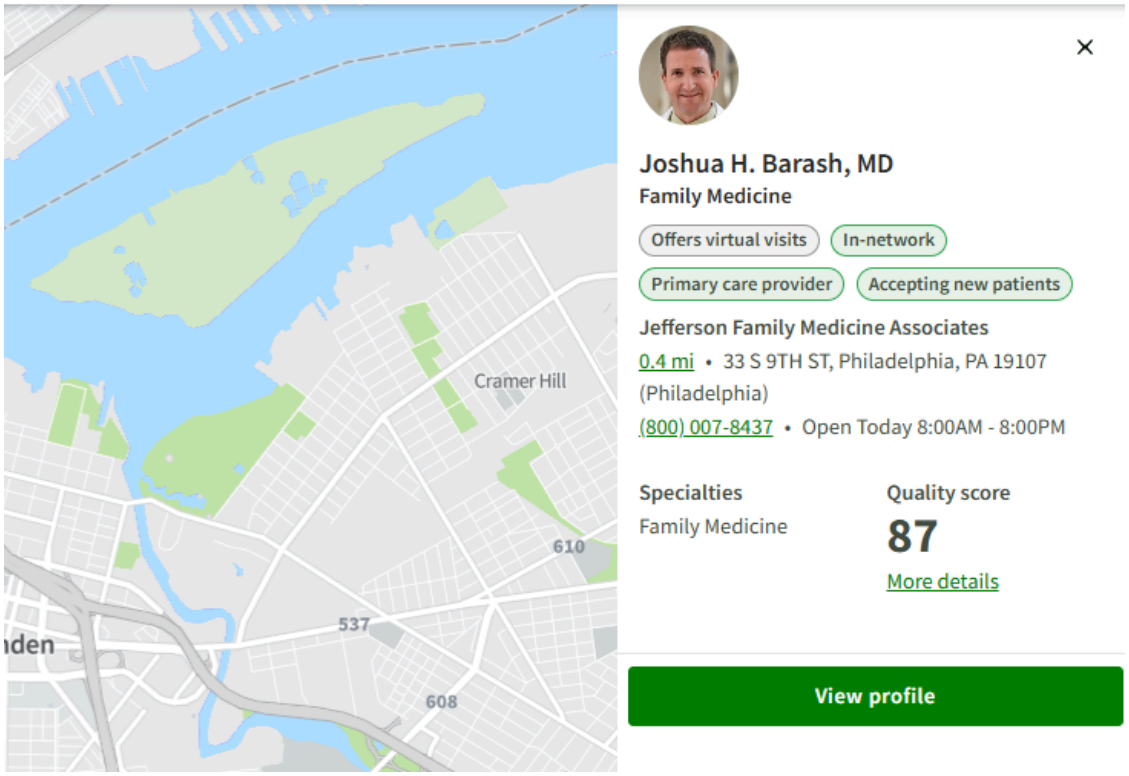

New Enhanced search cards in map view

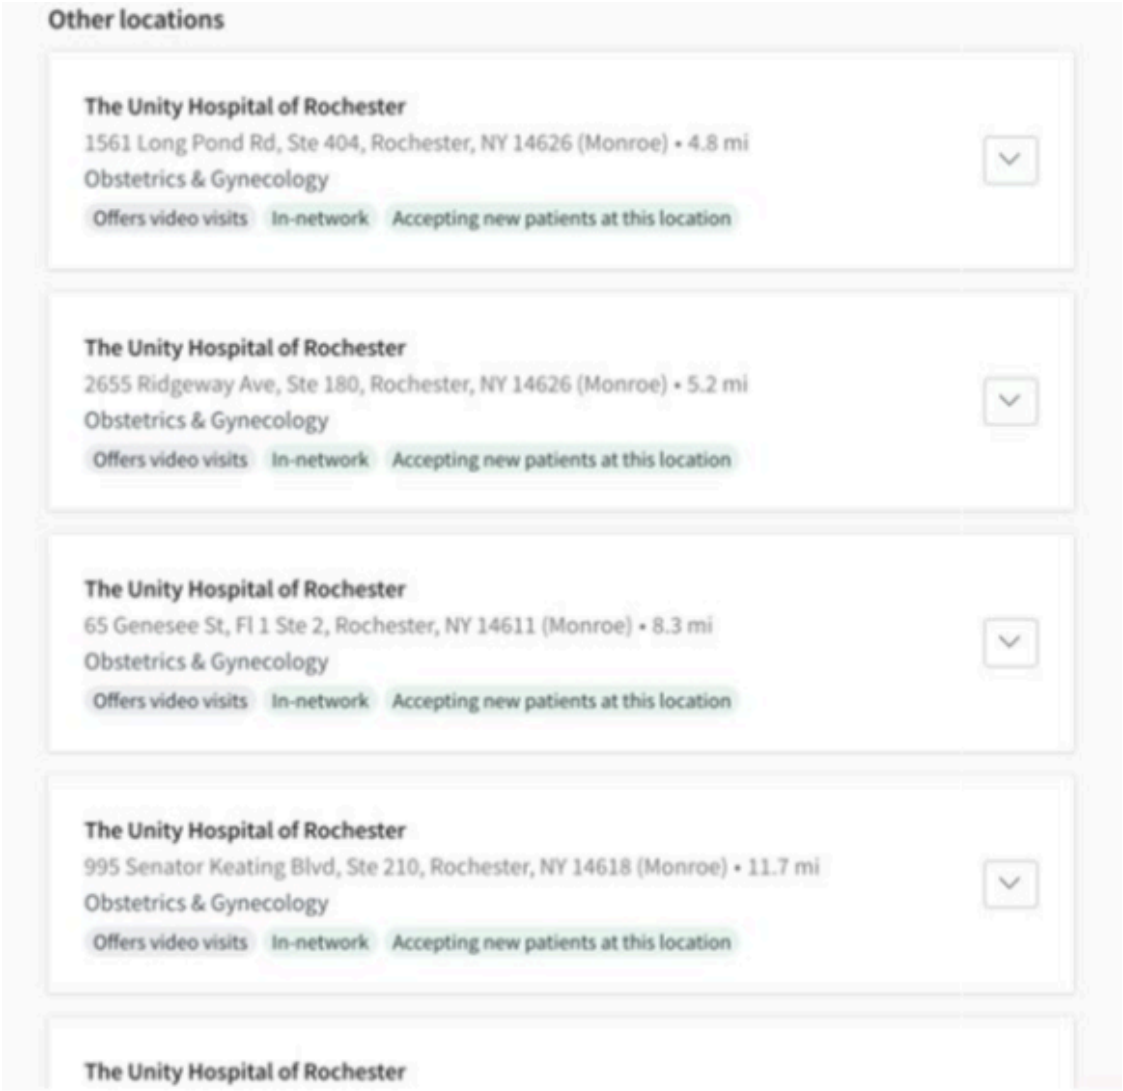

Before: Selected/expanded card in map view with all attributes shown and scrollable

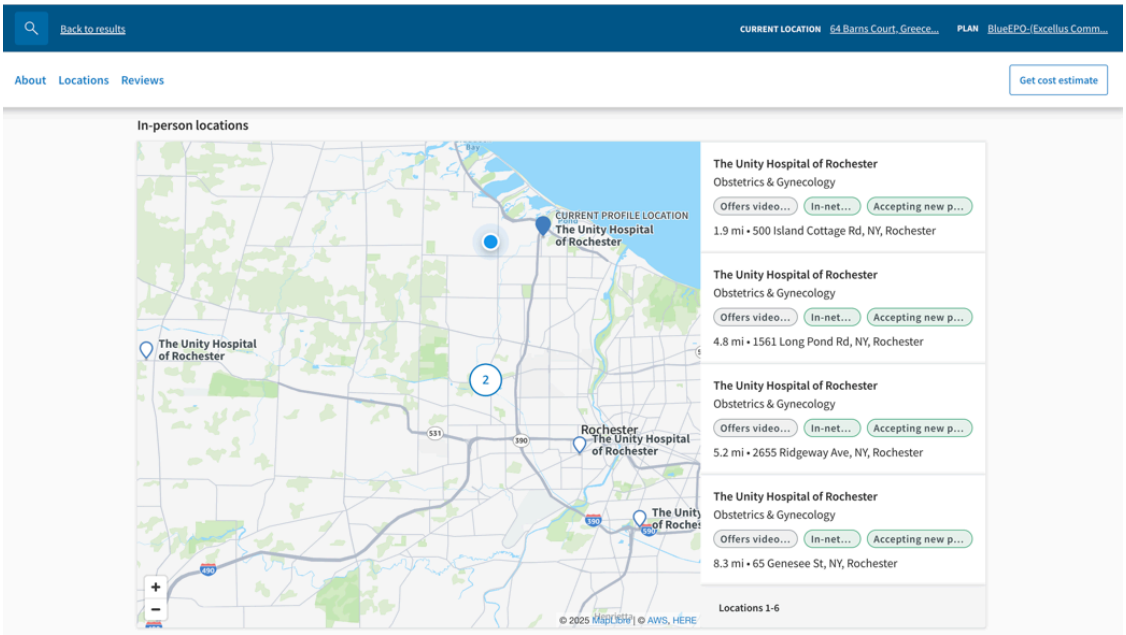

After: Selected/expanded card in map view with a max 2 attributes, consolidated layout

Before: In-Person Locations shown as collapsible dropdown cards, stacked vertically

After: In-Person Locations shown as an interactive map with enhanced cards alongside, with "Current Profile Location" hover label on the profile pin

Note: *Maps will not render automatically in UAT. You will need to click the button to load the map. In Production, maps will render automatically.*

Before this update, the map view in search results and the profile page location section displayed older card designs inconsistent with the enhanced search cards already live in the search results list. Members encountered a different visual experience depending on how they were browsing. The "Other Locations" section on a profile also required members to expand individual collapsible cards with no spatial context, and accessing the map required a separate button click. These changes bring a unified, streamlined experience across all surfaces.

These enhancements are auto-on and apply to all profile page types, including provider profiles, hospital pages, urgent care, etc.
These enhancements are **now in UAT** and will be in **Production on July 28, 2026**.

Register For July 22nd Medicare Plan Finder Information Session

/ July Roundtable

Join our product and customer success experts **Wednesday, July 15th, at 3:00 PM EST/12:00 PM PST,** for the July Roundtable to hear about upcoming enhancements, roadmap highlights, and opportunities.
Looking forward to seeing you there! The recording will be distributed here.
