May 26, 2026. Coming Soon to UAT: Search by Plan Menu Updates

We are continuing to refine the Search by Plan v2 experience based on your feedback. The final set of enhancements from this iteration are coming soon to UAT on **June 2nd**.

Impacted Customers

This update applies to all customers using Search by Plan, including those using the Search by Plan Wizard. These enhancements will be auto-on for all customers in Production on **June 30, 2026**. Prior versions will no longer be supported.

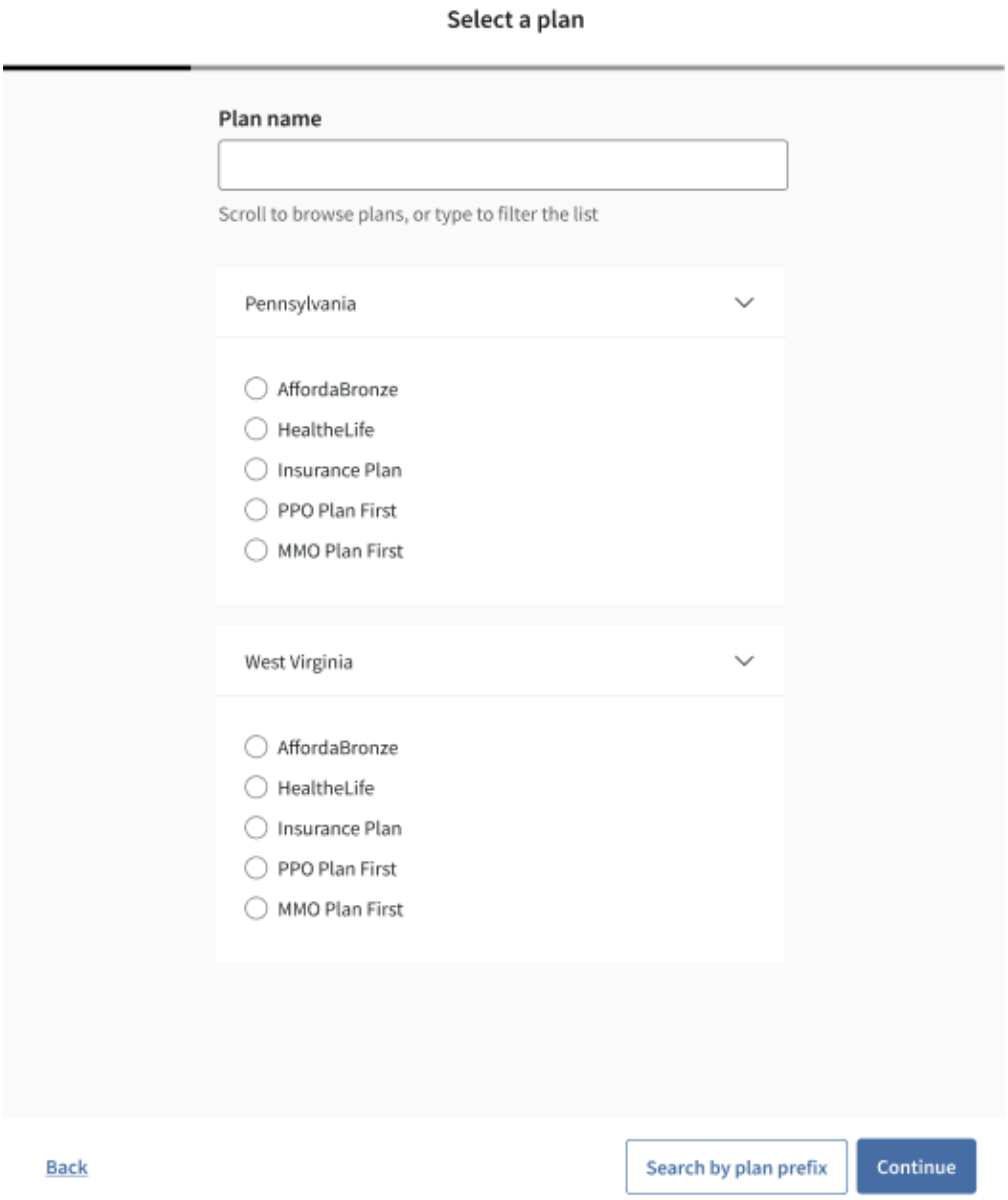

Key Changes:

- **Streamlined Intro and Location Screen:** The intro and location selection screens will be merged into one, cutting down unnecessary steps for members. Location-only and plan-only flows will incorporate intro text directly into the first screen. The progress bar will only be displayed for flows with more than two screens.
- **Location Collected Before Plan Information:** For flows that require location, members will now be prompted to enter their location first, before selecting their plan or entering a prefix. This eliminates a disjointed step in the previous flow.
- **Configuration for Blues customers that use both plan prefix and plan search flows:** Blues customers that use plan prefix and plan search flows will be able to configure how members first enter the plan

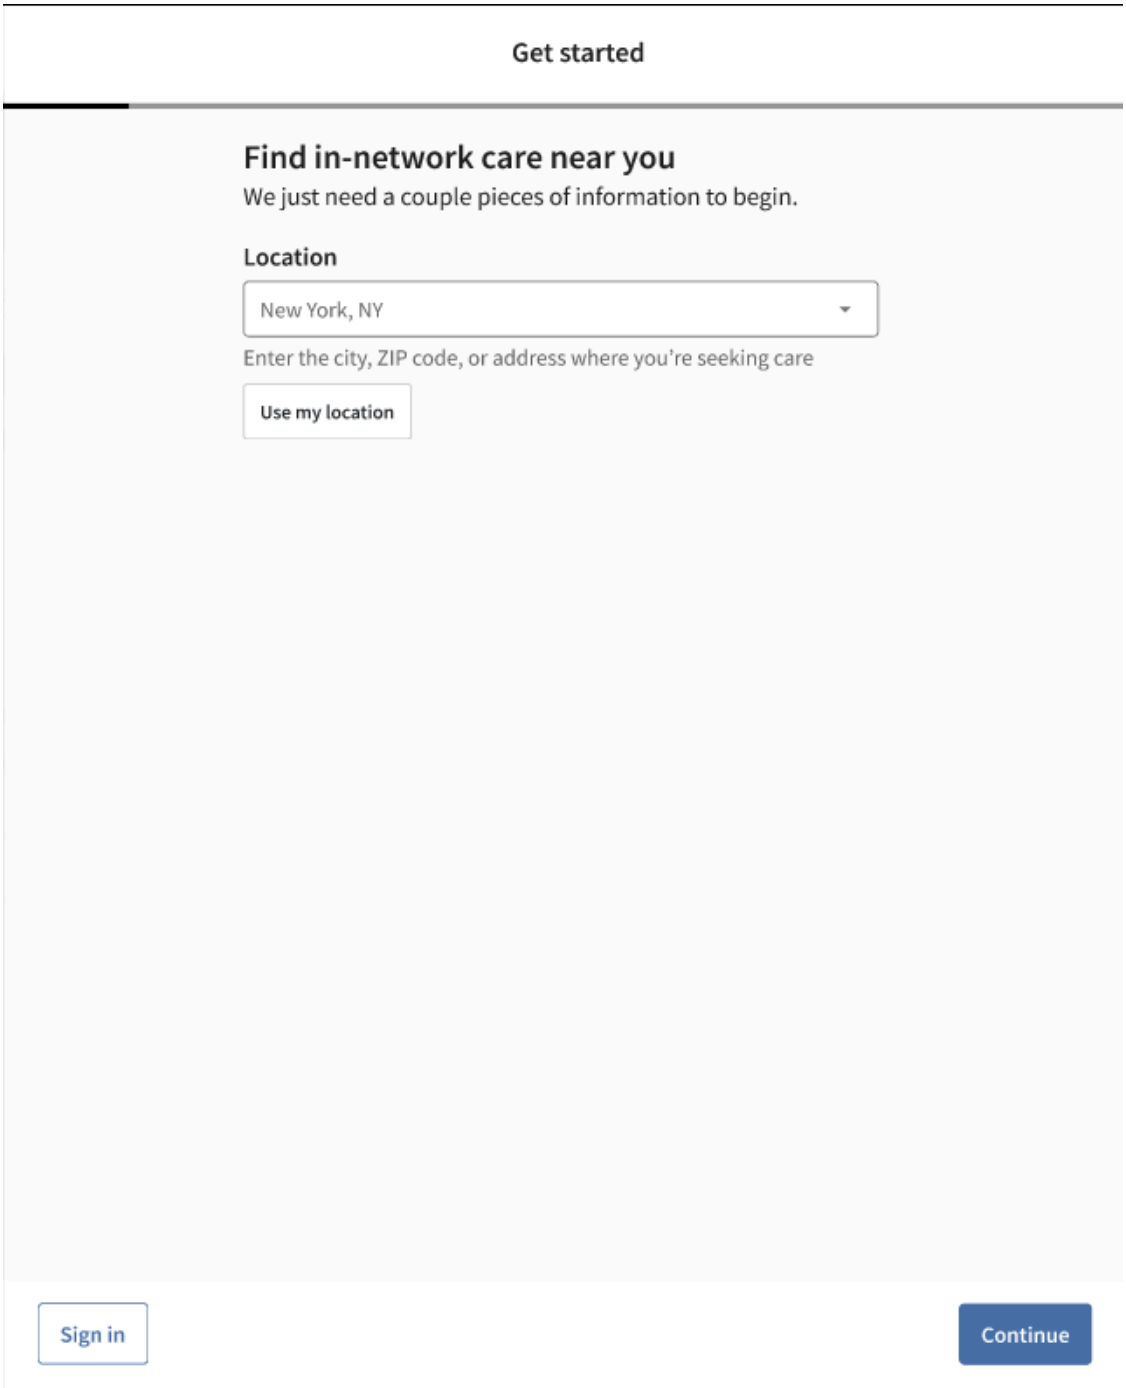

search experience. Three options will be available: defaulting to the Plan Prefix screen, defaulting to the Search by Plan Name screen, or presenting a fork screen that allows members to choose their preferred path. For customers configured to support both search types, a toggle button will also appear on each screen so members can easily switch between searching by plan name and searching by plan prefix without starting over.For plans that don't include plan prefixes, the default will be the Search by Plan Name screen and no toggle button will be visible.

- **Customizable Subtext on Plan Name Search Screen:**Customers will be able to add customizable subtext beneath the search box on the Search by Plan Name screen, allowing you to provide members with additional guidance or context when searching for their plan.

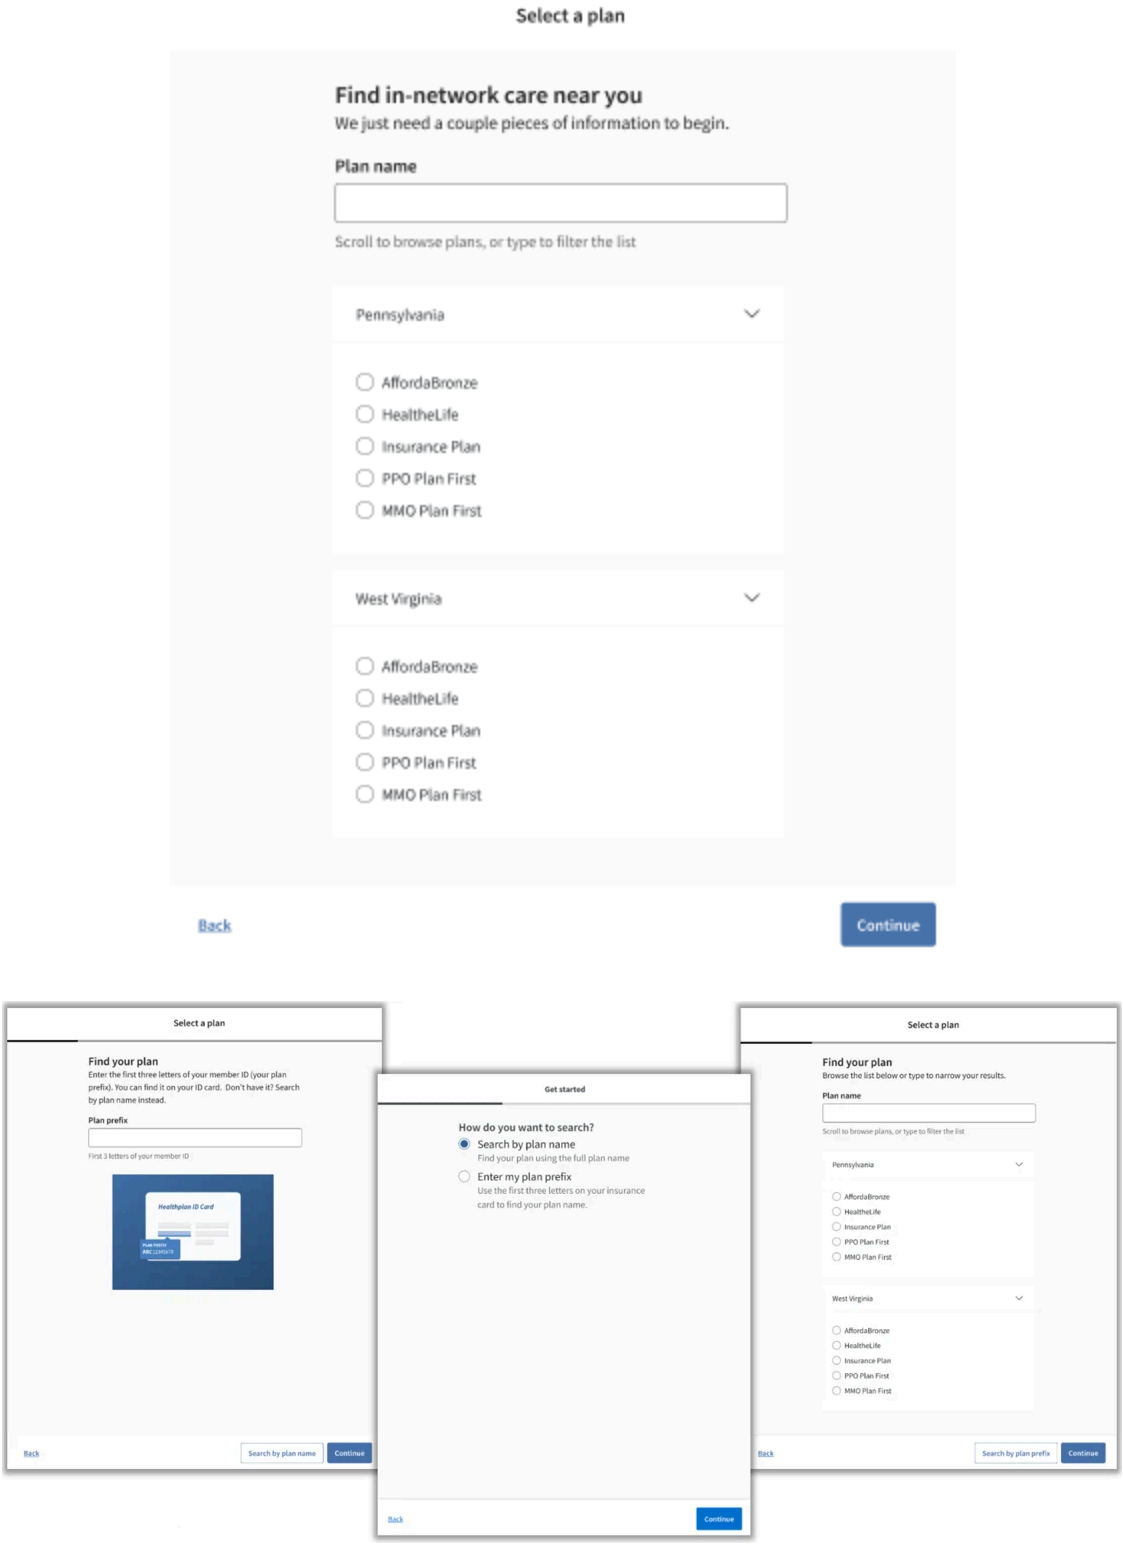

Example of customizable subtext displayed beneath the Plan Name input on the Search by Plan Name screen:

Example of the merged Intro and Location Screen:

Example of a plan-only flow where location is not required. The intro text is displayed directly on the Search by Plan Name screen:

Example of the configurable entry point options for Blues customers with plan prefix and plan search flows: Plan Prefix, Member Choice, Plan Name. Also see toggle button allowing members to switch between search types in the lower right of the plan prefix and plan name screens.

These changes will be deployed to UAT on June 2 for all customers and auto-

on in Production June 30, 2026.

/ Medicare Plan Finder Phase 2 Info Session

Program Overview

Beginning Contract Year (CY) 2027, all payers offering individual Medicare Advantage (MA) plans must submit provider directory data to CMS via FHIR-based JSON API files.

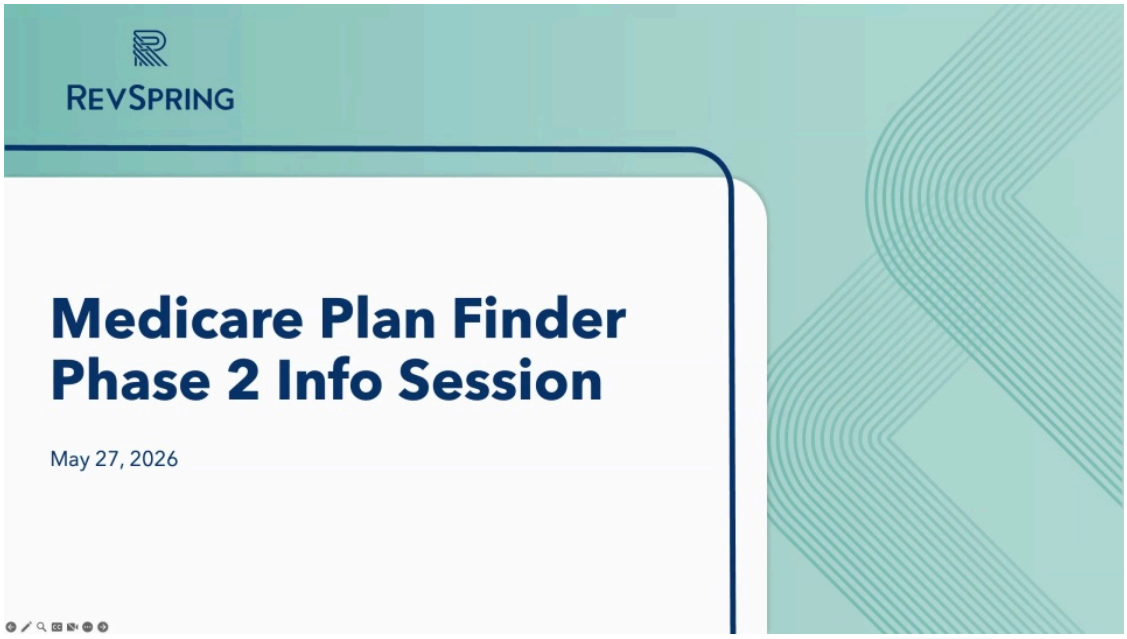

- RevSpring's Role: Hosts, maintains, and refreshes these API files daily based on your provider pipeline.
- CMS's Role: Crawls the designated URLs daily to extract, validate, and ingest directory data into the Medicare Plan Finder (MPF).
- Payer's Role: Ensures data accuracy and completes an annual compliance attestation in HPMS.

Key Deadlines & Timeline Updates

Based on client feedback regarding ongoing CMS contract negotiations, the final production timeline has been extended:

- Early June 2026: Wave 1 testing window opens (Testing URLs will be shared by RevSpring in the first two weeks of June).
- August 14, 2026: [Updated] Deadline to submit finalized, production-ready CY 2027 crosswalk data. (Contact your Customer Success Partner immediately if this date is unfeasible).
- September 1, 2026: Deadline for an authorized officer (CEO/CFO/COO) to electronically sign the accuracy attestation in HPMS.
- October 1, 2026: MPF 2027 production release goes live to the public.

5.27.26 Medicare Plan Finder Information Session

/ Provider Data Solutions: Validate

May 27, 2026. Generally Available: Attested Timestamp

The Kyruus Health Validate Report now includes a contact cleaned at date time (pacific) column. This field captures the date and time a provider contact record was attested to, giving greater visibility into data freshness for each record. The updated file spec can be found attached to the Kyruus Health Validate Report support article.
