Coming Soon! Updated Date of Birth Entry and Clearer Search in Scheduling

As part of our iterative facelift of Scheduling, we're updating the date of birth and typeahead fields on the first step of the scheduling flow with new design components. The result is a simpler, more consistent experience that's easier for patients to use.

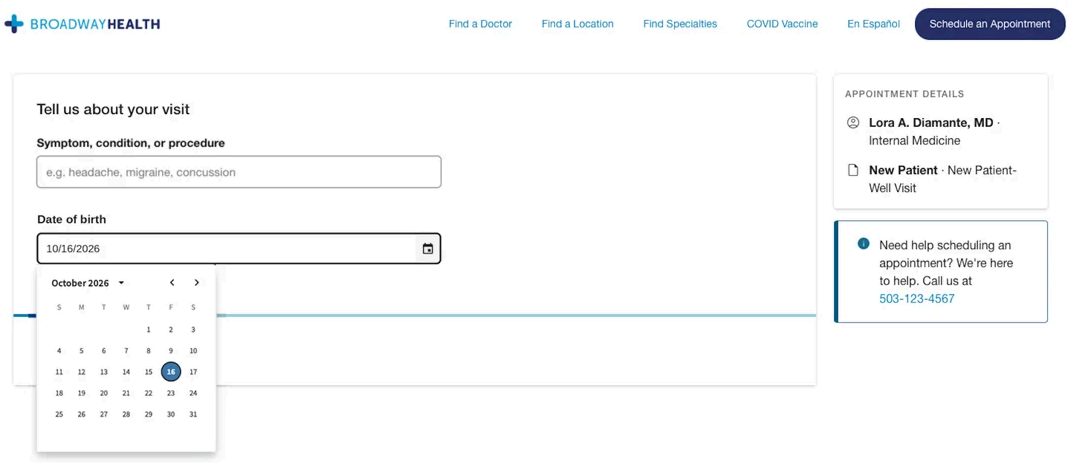

What's coming

- **One date picker instead of three fields:** Patients currently complete three separate fields to enter a date of birth. They'll now use a single, streamlined date picker.
- **Loading indicator on autocomplete:** The typeahead field will show a loading indicator while results load, so patients know the system is working.
- **A foundation for every patient:** The new date picker is built to support different date formats, so entering a date of birth can feel natural to patients wherever they're from and however they're used to writing dates.
- **Same functionality:** All existing features and behavior stay in place.

Before

After (Design Subject to Change)

Before this update, entering a date of birth meant moving through three fields, and the typeahead did not show when results were loading. These changes simplify both steps. They are also one step in a series of updates that will bring the full Scheduling flow onto a modern, consistent design.

This update will roll out to all health systems using Scheduling in the next few weeks. If you have any questions, please reach out to your customer success partner or support team.

/ Reach: Reputation Management

October 22, 2026. Now in Production: Yelp Review Monitoring in Reputation Management

You can now monitor your Yelp reviews in Reputation Management. Yelp is one of the places patients look when choosing a provider, and its reviews now appear

alongside your other review sources in Kyruus Connect.

With Yelp monitoring, you can

- See new and existing Yelp reviews for your locations in one place
- Keep an eye on reviews across sources without logging in to Yelp separately
- Redirect out to the Yelp platform to reply to reviews

Replying to Yelp reviews directly from Reputation Management is coming soon. We'll share an update when it's available. For more information on this feature, please take a look at our Help Center article.

/ October Roundtable Recap

October 21, 2026. Health System Roundtable: What Is Coming in Q4 2026
Thank you to everyone who joined our October Health System Roundtable. The Q4 2026 Product Roadmap shows what is coming across seven areas: AI enrichment, Data management, Reach, Schedule, Care Navigation, Search + Guide, and Analytics.
